- Microsoft Code Push
- Mixpanel
- Xcode

PERSONAL PROFILE

I am a dedicated Full Stack Web Developer who is passionate about learning and adept at swiftly embracing new technologies. I take pleasure in exploring the latest industry advancements. My expertise lies in MERN Stack development, where I have actively contributed as a key member of development teams.

WORK EXPERIENCE

2022 (JULY) - Present

ARSR TECH - Centaari

Full stack developer

- Developed **B2B web applications** demonstrating expertise in both front-end and back-end development.
- Utilized **Neo4j graph database** technology to visualize data in nodes-and-edges format on the frontend, leveraging the **Sigma.js** library for enhanced data representation and accessibility.
- Leveraged **OpenAI's generative AI** APIs, such as Chat, Speech-to-Text, and Text-to-Speech, to enhance interactive functionalities and accessibility within applications.

2021 (March) - 2022 (JULY)

Audy Global Enterprises

Software Development Engineer

- Developed custom mobile applications by **converting Shopify websites**, incorporating drag-and-drop UI creation for seamless user experience.
- Developed E-Commerce admin portals with **integrated shipping (Shipstation)** and **payment integration (Stripe)** for refunds.
- Integrated **Microsoft CodePush** for instant app updates.
- Maintained a Health-based social media app live in **Apple Store and Play Store**.

ACHIEVEMENTS

Kudos Award

Received kudos award for exceptional contribution towards projects.

PERSONAL PROJECTS

Online Quiz Championship Web App

- Created a web application enabling the hosting of quiz championships with live video access using zoom call.

Real Estate Enterprise Platform

- Developed a web app for property management, allowing users to opt for services and manage tenants.
Integrated RazorPay for rent payments, enabling direct transfers to owners' accounts.

Bike Service Booking Web App

- Designed a web application for bike servicing, enabling users to book and manage their service history.
Implemented automated email (**Nodemailer**) and SMS (**Firebase SMS integration**) notifications for service updates.

Third-Party Login

- Developed a mobile app allowing users to log in with **Google, Facebook, and Apple** accounts for seamless authentication.

Face ID and Fingerprint Unlock Mobile App

- Created a simple mobile app with **Face ID** unlock for iOS and **fingerprint** unlock for Android using React Native.

Movie Listing App

- Developed an Android application with React Native for discovering top-rated and trending movies. Utilized an **open-source API** for real-time movie information retrieval, providing a user-friendly movie exploration experience.

Weather App

- Built a mobile application for checking weather conditions, featuring a transparent UI with weather-based icons.
Integrated open-source AI technology and utilized Tailwind CSS for seamless design implementation.
